

AppScape™ Energy Resource Management Suite

DRIVING SUSTAINABLE BUSINESS PRACTICES AND GOALS

A Comprehensive, ERP integrated solution to provide effective management of energy performance and carbon footprint with multiple options for data capture, configurable alerting systems, workflow capabilities, sophisticated analytics with pre-built industry KPIs and built-in knowledge base. Companies that are embracing our Energy Management Solutions are looking for ways to:

- Ensure they are consuming energy efficiently
- Identify energy saving opportunities up to 20% in your enterprise
- Increase their data collection efficiency and reliability
- Act in real-time and be able to predict their future energy footprint
- Make informed purchasing decisions and pricing negotiations
- Measure their corporate greenhouse gas emissions
- Meet Regulatory and Certification compliance standards
- Integrate Energy Management into their existing ERP solutions
- Improve their brand image with a green reputation

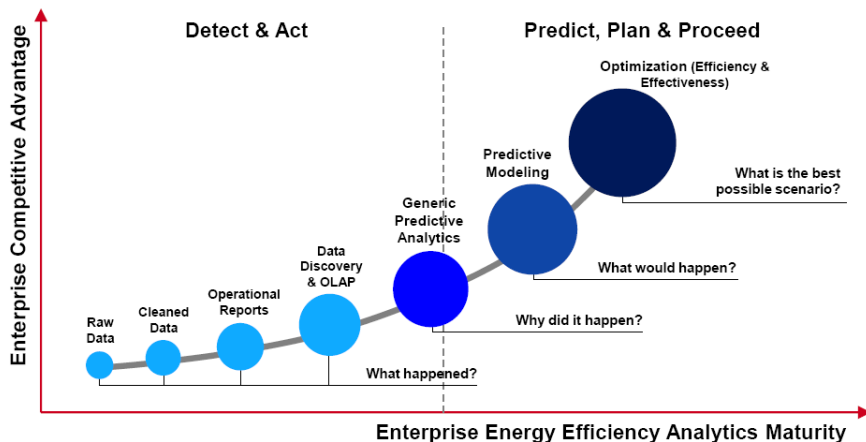

APPSCAPE ENTERPRISE ENERGY MANAGEMENT SOLUTIONS:

- Energy Management Portal
- Energy Analytics (BI)
- Predictive Analytics
- Financial Analysis
- Dynamic Load Management & Control
- Energy Operational Efficiency Management
- Proactive Equipment Maintenance
- Energy Accounting System
- Smart Meter Data Management
- Carbon Footprint/Emissions Tracking

For companies that recognize the need to embrace sustainability and energy management, the next step is to understand what actions you can take and how to ensure you are staying on course.

At AppScape, our solutions and tools help you define, plan, implement and measure profitable energy management solutions and world-class practices. Using AppScape's packaged software, you can save up to 20% of your energy costs.

AN AUTOMATED SOFTWARE SOLUTION PROVIDING EXTENSIVE CAPABILITIES TO MONITOR, ANALYZE, AND MANAGE THE ENERGY CONSUMPTION WITH GUARANTEED SAVINGS AND CARBON EMISSIONS OF YOUR ENTERPRISE.

Real-time Data.

Unlike conventional systems that give you passive alarms and notifications which are usually outdated and not context sensitive, with AppScape's real-time energy performance, you get an accurate understanding of the nature of the problem in your energy assets, and how to go about fixing it.

Automatic Monitoring.

AppScape continuously monitors asset health, analyzes performance and energy consumption data, and generates alerts based on precise diagnosis, so you can proactively drive your predictive maintenance programs

Predictive Analytics.

Define operational rules to predict failure and drive specific action. You get alerts and notification proactively, giving you plenty of time to respond and avoid disruption. The solution enables you to build continuous knowledge base to help you find the answer with reasonable accuracy over a period of time.

Advanced Business Intelligence.

Enable real time, interactive access, analysis, and decision making at various levels of organizational management. You can access and leverage vast amounts of information to analyze relationships and understand trends that support business decisions related to energy.

User Experience.

You get a highly configurable user interface across various modules on multiple platforms such as personal computers, tablets, and smart phones. Completely supports BYOD policy of your enterprise.

About AppScape

AppScape, Inc. is one of the leading software solution providers for Enterprise Energy Performance and Carbon Management. AppScape's solutions leverage innovation in hardware design, embedded software, web-based applications and system integration to provide a superior customer value proposition.

Our flagship product AppScape™ ERM Suite is a comprehensive energy performance and carbon management solution whose actionable analytics help customers acquire, manage and predict the performance of their enterprise-wide energy assets. AppScape's pre-built data collection and aggregation functionality provides a single platform with a unified, real-time view of enterprise energy consumption and sustainability analytics.

AppScape's in-depth functionality in data modeling, business intelligence and predictive analytics coupled with backend ERP (SAP) and BI Platform (MicroStrategy) expertise, enables customers to run their energy and sustainability initiatives with pre-built KPIs.

Available as both On-Premises and SaaS solution, AppScape ERM Suite enables customers to meet internal performance goals as well as external sustainability, regulatory and certification compliance needs.
